

AHD objectives 2/22

Melanoma 9:30 – 10:15

1. What are the 4 main subtypes of invasive cutaneous melanoma?
2. Describe the ABCDE mnemonic that can be used in the evaluation of skin lesions.
3. What is the most important prognostic parameter in the evaluation of a primary melanoma tumor?
4. Describe the recommended surgical margins based on the thickness of the lesion.
5. List the tumor markers associated with melanomas and the targeted treatment that corresponds with each.
