

Objectives 3/26/2024

MAFLD/MASH

1. List the risk factors for the development of metabolic dysfunction-associated fatty liver disease.
2. Describe the clinical criteria for the metabolic syndrome.
3. List treatment options for metabolic dysfunction-associated fatty liver disease.

Dysphagia

1. Compare oropharyngeal and esophageal dysphagia. What are the common causes of each? What are the clinical manifestations of each?
2. When is upper endoscopy warranted in patients with GERD?
3. How is eosinophilic esophagitis diagnosed and what is the recommended treatment?
4. How is achalasia diagnosed and what are the treatment options?

Autoimmune hepatitis/cholestatic liver disease

1. Describe the diagnostic testing autoimmune hepatitis.
2. Describe the recommended treatment for autoimmune hepatitis and the duration of therapy.
3. Outline what is required for a diagnosis of primary biliary cholangitis and the first line treatment recommendation.
4. What are the recommended colorectal cancer screening guidelines in patients diagnosed with primary sclerosing cholangitis.
